Power Distribution Systems

Power Distribution Systems

➔ Course Objective

- The basic elements of a Power Distribution Systems
- Power Distribution System Quality
- The planning procedure of Power Distribution Systems
- Selection of various elements of a Power Distribution Systems
- Power Distribution Systems analysis
- Starting up of a Power Distribution Systems
- Power Distribution Systems performance monitoring
- Power Distribution Systems troubleshooting
- Testing and operating problems

➔ Target Audience

- Engineers

➔ Course Outline

Day 1

- The basic elements of a Power Distribution Systems
- Power Distribution System Quality
- Power Distribution System Harmonics
- Power Distribution System Sags

- Power Distribution System Swells

Day 2

- The planning procedure of Power Distribution Systems
- Design aspects in order to choose of various components of a Power Distribution Systems PART I
- Routing
- Cables
- Transformers
- VAR Compensators

Day 3

- Design aspects in order to choose various components of a Power Distribution Systems PART II
- Transformers
- VAR Compensators
- Power Distribution Systems analysis

Day 4

- Power Distribution Systems Protection
- Classical Protection schemes
- Solid-State protection schemes
- Starting up of a Power Distribution Systems
- Power Distribution Systems performance monitoring

Day 5

- Power Distribution Systems commissioning,
- Power Distribution Systems testing

- Power Distribution Systems starting up
- Power Distribution Systems troubleshooting

➤ **The Feature Of Asia Master Training And Development Center**

- we pick up the customer from the airport to the hotel.
- we give the participant training bag includes all the necessary tools for the course.
